AN IMAGING NETWORK

January 27, 2003

Mr. Michael Dobbins  
Mobile Conversions, Inc.  
2658 Airport Road  
Bethel, OH. 45106

Dear Michael:

I am writing to thank you and your organization for the great work you performed to extensively refurbish our mobile nuclear medicine vehicle.

The original project scope included the following:

- Removal of the imaging coach from the Isuzu chassis that it was on.
- Recondition the external surface of the imaging coach below the beltline
- Remove and replace the electrical generator
- Install the imaging coach on the Freightliner chassis that we provided

After the vehicle arrived at your facility we added further upgrades to the stabilization jack system (Full replacement), heating, air conditioning, and ventilation system (High Side Replacement), repair/repaint entire external surface of the imaging coach, interior décor upgrades, as well as numerous other items.

Mobile Conversions took the initiative to assure the project was completed within the original indicated time frame, even with the additional tasks that were not scheduled initially. The end results on the refurbishing project have exceeded our expectations. With the expanded scope of the project, we did go over our budgeted dollar figure for this project. Mobile Conversions was most cooperative in working with us to minimize the impact of this overage.

AN IMAGING NETWORK

Michael, please feel free to offer my name and Consulting Radiologists, Ltd. as a reference to others who are considering a mobile project. Mobile Conversions, Inc. has both built new mobile coaches as well as reconditioned the most recent mobile coach for us. In both cases, your cooperation and can do positive attitude and the resulting outcome are greatly appreciated.

Sincerely

Dale Anderson
